## PROFILE

Detail-oriented Frontend Developer and Industrial Engineering undergraduate at UNIBEN, with a passion for building responsive, visually captivating digital experiences. A disciplined self-learner certified by Edo Bit ICT and NABTEB, I possess a proven ability to master new technologies independently. I leverage a strong engineering foundation to construct structured, efficient web applications and am currently translating those skills into mobile app development. Specializing in the merger of technical precision with creative UI/UX, I am seeking a challenging role to leverage my rapid learning agility and deliver real-world technical impact.

## EDUCATION

### Bachelor of Engineering (B.Eng), Industrial Engineering

University of Benin (UNIBEN)

Estimated Finish Date: October, 2026.

#### Related Coursework:

Systems Engineering, Human Factors & Ergonomics, Operations Research, Plant Layout & Facility Design, Computer Programming, Project Management, Quality Control, Engineering Economy, Planning & Control.

### Certificate in Frontend Web Development, Diploma

EdoBits ICT Academy - 2020 - 2021

Completed intensive training in HTML, CSS, JavaScript, and Responsive Design.

Design Tools: Adobe Photoshop, Adobe Illustrator, Figma.

Productivity: Microsoft Excel, Words, PowerPoint.

### National Technical Certificate (NTC/NBC)

National Business and Technical Examinations Board (NABTEB) - 2020

#### Honors/Awards

- Overall Best Web Dev Student 2020/2021 - EdoBits ICT Academy

#### Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

#### Frontend Frameworks & Libraries:

- React.js, Next.js (App Router, SSR, SEO), React Native.
- Redux, React Context API, React Hook Form, Zod (Schema Validation), TanStack Query.
- Tailwind CSS, Bootstrap, Gsap, Framer Motion (Animations), Radix UI, Shadcn/ui, Styled Components.

CMS & No-Code Platforms: WordPress, HubSpot CMS, JotForm Automation

Tools & DevOps: Git, GitHub, GitLab (Pull Requests, Code Reviews), Figma, Adobe Photoshop, Adobe Illustrator, Vercel, Netlify, cPanel

## EXPERIENCE

### E-COMMERCE DEVELOPER

Visit Site ↗

HYP3 | October, 2025

**Application Architecture:** Architected a high-performance Next.js application, utilizing Server-Side Rendering (SSR) and dynamic routing to ensure rapid page loads, scalability, and SEO optimization for the marketplace.

**Component-Based UI:** Engineered a modular design system, breaking down high-fidelity UI designs into reusable, self-contained components to ensure code maintainability and visual consistency across the platform.

**Responsive Optimization:** Implemented a "Mobile-First" strategy, ensuring pixel-perfect layout adaptation across all devices while optimizing asset delivery (images/scripts) to achieve minimal load times.

### FRONTEND UI/UX DEVELOPER

Visit Site ↗

Skinny Cans | June - August, 2025

**Pixel-Perfect Implementation:** Translated high-fidelity UI designs into a responsive Next.js application, utilizing shadcn/ui for accessible, robust component architecture.

**Advanced Interactivity:** Engineered smooth, complex micro-interactions and page transitions using Framer Motion, enhancing user engagement and "app-like" feel.

**Design System Integration:** Built a scalable UI kit using Tailwind CSS and class-variance-authority (CVA), ensuring visual consistency and rapid development across the platform. Utilized Swiper.js and responsive grid systems to create touch-friendly interfaces for mobile users.

**Global Accessibility:** Implemented next-intl to support multi-language localization, ensuring the interface is ready for a global user base.

### WEB DEVELOPER - CMS & AUTOMATION

Visit Site ↗

Rawlab Ventures | May - July, 2025

**HubSpot CMS Development:** Developed and managed the firm's digital ecosystem using HubSpot, customizing templates and modules to align with the "House of Ra" brand identity.

**Lead Capture Automation:** Integrated JotForm with HubSpot CRM to automate the "Win a Strategy Seat" and "Join the Circle" intake pipelines, streamlining the vetting process for high-value leads.

**Content System Architecture:** Structured the "Insights" and "Dispatch" blog infrastructure, enabling the team to publish thought leadership articles with optimized SEO performance.

**Responsive Optimization:** Ensured a seamless mobile-first experience across the platform, optimizing site speed and accessibility for global investors.

### FRONTEND WEB DEVELOPER

Visit Site ↗

Lendasat | October - January, 2024/2025

**Zero-to-One Dashboard Development:** Engineered the borrower dashboard from concept to code, independently designing the layout and UX patterns in the absence of static UI.

**Remote Team Collaboration:** Integrated into a high-level remote engineering team, utilizing Git for version control and passing strict peer code reviews before merging.

**Functional UX Design:** Translated raw financial data requirements (LTV ratios, Collateral Health) into an intuitive, interactive dashboard using [Your Tech, e.g., Tailwind/Shadcn] for rapid UI development.

**Landing Page Implementation:** Led the UI design and development of the public landing page, creating a high-trust visual identity for the platform.

### WORDPRESS DEVELOPER

Visit Site ↗

Lumina | June, 2024

**Custom CMS Development:** Deployed and customized a scalable WordPress architecture for a high-traffic marketing agency, enabling the team to manage case studies and testimonials independently.

**Pixel-Perfect Design:** Translated a complex, high-fidelity "Dark Mode" UI into a custom WordPress theme, utilizing Elementor/Divi/Custom CSS to match the neon Web3 aesthetic perfectly.

**Lead Generation Engine:** Integrated marketing automation tools (Calendly & Mailerlite), creating a streamlined "Book a Call" funnel that captures high-value B2B leads.

**Performance Optimization:** Optimized the WordPress environment (Caching, Image Compression, Database Cleanup) to handle video backgrounds and high-res assets without compromising load speeds.
